Problem: Mapped Images Not Found with "Interior Space" Tutorial

The "Ar4 Tutorial" library is pathed to images in folders that do not exist. The result of this is that some materials look default gray in the "*Interior Start.dwg*" or "*Interior Finished.dwg*". This drawing is used with the "Interior Space tutorial" that is in the AccuRender 4 "Getting Started" on page 24.

To fix this problem, add the location where the files are stored to the AccuRender General Search Path.

- 1. Open AutoCAD.
- 2. Type Ar4 to load AccuRender 4.
- 3. In the AutoCAD command line, type **Options** or pick it from the Tools menu. From the Options dialog, pick the AccuRender tab.

- 7. Pick the OK button to close the Options dialog and save your changes.
- 8. Close AutoCAD. Reopen AutoCAD and reload Ar4.
- 9. Open the 'Interior Finished" model and pick the Walk About tab to load the model. Render according to exercise instructions.
