

In installing and using MaqueTools or MicMacTools on your computer, you agree to the following:

The toolset scripts have been written by Mitch Heynick and are offered to the public free of charge. They are distributed in the hope that they will be useful and educational, but without any guarantee whatsoever - use them at your own risk. In general the scripts included in the collection are entirely the work of the author. If any significant portions have been copied from someone else, the script header will include credit for that person. You may modify and adapt the scripts as you see fit; if you copy and redistribute them please credit.

If you have any questions about the scripts or their content, please send an e-mail to the address on the web page or post on the main Rhino forum.
